More Realistic Molecular Modelling of Catalytic Processes with the Combined QM/MM and *ab initio* Molecular Dynamics Method

Tom Woo[§], Tom Ziegler

Department of Chemistry, University of Calgary, Calgary, Alberta,
email: tkwoo@cobalt24.chem.ucalgary.ca

[§]new address: Department of Chemistry, University of Western Ontario, London, Ontario.

ABSTRACT: The combined Quantum Mechanics and Molecular Mechanics (QM/MM) and the *ab initio* molecular dynamics methods (AIMD) are fast emerging as powerful computational tools. Both methods allow for the incorporation of effects that are often neglected in traditional high level calculations, which may be critical to the real chemistry of the simulated system. In this presentation, these methods will be introduced with 'real-life' examples that showcase their unique capabilities.
