## What my write i essay argumentative conclusion about should

### Smoking should be banned in all public places

Every year thousands of people die because of being exposed to other tobacco related substances in smoking. Smoking is seen everywhere from our own tobacco stores to even the world wide web. The Internet. Tobacco is the substance that is in these cigarettes. These tobacco products are produced through tobacco that are found almost everywhere you go. They are in magazines, tobacco stores, on the Internet and even on cigarette boxes themselves. Also, that tobacco also has the whole truth. That many people still go to these tobacco stores and even they try to smoke. They are hooked on it. The reason that it is so addictive is because people want people to get the taste, so you can see that they have been addicted to the habit of smoking. Nowadays in almost all parts of the world, the tobacco companies have people who are in charge when it comes to public areas, but others who do not smoke complain about that, so much so that it has become an issue. So, should smoking be banned in all public places? I would say yes, they should.

Firstly, when many smokers smoke in public places, the people around them who do not smoke breathe in the smoke and they become passive smokers. These smokers can even get very ill due to the many years of passive smoking. Smokers have even claimed that the smoking of the kind of cigar causes more than seven years in the hospital. The Environmental Protection Agency also reported that passive smoking causes 3500 to 5500 lung cancer deaths a year among non-smokers in just the U.S. alone. We may not know this but we can know that passive smoking can even kill someone who did not choose to smoke just like how fatal it is when a smoker smokes, leading toward death. Thus, it is enough for the smoking should be banned.

Secondly, smoking does not harm the environment and pollute it. In addition, it is a fact that our planet has air pollution and it can help to contribute to harm the planet. Environmental tobacco smoke (ETS) remains more than fifty substances that are known to cause cancer in human beings or even animals. Sometimes people think that the gas in the smoke is not bad for the air but they do not realize that it is not only irritating when they breathe. They have got it reported that the tobacco from people all over the world and when it is taken away by the wind, it also pollutes the air. In 2005, about 13 billion cigarettes were smoked in the world with air quality that did not meet the standards. But what many still do not know is that these cigarettes are burning. This shows that smokers do not even know or bother about the consequences that their smoking brings. I think the only way that they would become smokers of this is if smoking is banned in all public areas.

Another thing is that if smoking was to be banned in all public places, it would force those smokers to smoke less and it would be a great thing. Smokers would then group that they can only smoke in a particular area that is private and personal like their own rooms. However, some may think that if they are in public places they would not be able to smoke and smoking bans to reduce the amount of cigarettes they smoke is a step. This may cause some side effects due to their addiction of nicotine, tar, and carbon.
